

Designer Protein Therapeutics

Vijaya R. Pattabiraman

Bright Peak Therapeutics, Klybeckstrasse 191, 4057 Basel, Switzerland

vpattabiraman@brightpeaktx.com

Bright peak therapeutics is an early-stage biotechnology company with a portfolio of differentiated biotherapeutics for applications in immunooncology and autoimmune diseases. Bright peak's unique chemical protein synthesis technology provides access to enhanced designer cytokines with tailored modifications for modulation of biological function.

The platform technology allows a medicinal chemistry approach for optimizing the molecular structure of proteins with minimal changes to wild-type protein sequence. This talk will provide a brief overview of the technology for discovery & development of designer cytokines and their conjugates for therapeutic use.
